## Lekce 4: Jak si sestavit studijní plán a k čemu je dobrý

### How to create a sound study plan

What is the secret to master a foreign language?

How is it possible that somebody can learn two, three, four or even more languages and somebody else **is stuck with** one at a basic level?

**How come** that I could reach the B2 level in Italian within less than a year?

You already know that it is not because of a talent. Talent doesn't do the job.

Talent doesn't mean that I open a book and all the knowledge just jumps in my head and stays there forever.

**Actually**, it was really a hard work and a lot of time and a lot of effort.

But the friends who want to know the secret don't believe me. They say they also give it a lot of time and effort. They go to a group lesson once a week.

If you still remember from yesterday – learning 1 hour per week will get you to the next level in 3,5 years.

In that case, reaching the B2 level should take 14 years.

I reached the B2 level in Italian in just 1 year because I spent with the language two hours every day. It is as simple as that.

The true secret is using the language every day, anytime during the day.

No, i don't mean reading every page of a textbook, nor repeating exercises, talking about topics that a book suggests that i should learn. No.

The secret is using the language in everyday life, try to express whatever is going on around me right now.

With every topic which I learn I rush quickly into the phase three.

Remember? Phase two is learning from a book. Phase three is using it.

Phase three is very challenging and demanding. You will make mistakes, but you will learn from them. **The sooner** you start, **the sooner** you get better.

In today's lesson you are going to learn how to prepare a good plan for using English every day.

You will be surprised how much time you can find in your day for English – you will discover time gaps of which you probably weren't aware at all.

Just watch the other short video where I show you how to fill your days with English.

## **Všimla jste si? *Have you noticed?***

**(to be) stuck with** ➡ být s něčím / na / v něčem zaseknutý

**How come?** ➡ Jak to? (Jak je to možné?)

**actually** ➡ vlastně, skutečně

In this lesson you can find out how much time you actually have. – V téhle lekci zjistíte, kolik času vlastně / skutečně máte.

Actually, I don't care. / I don't care, actually. – Vlastně mě to nezajímá.

**the sooner... the sooner** ➡ čím dřív... tím dřív

**the + 2. stupeň přídavného jména nebo příslovce v obou větách**

the sooner, the better – čím dřív, tím líp

The more petrol you have, the further you can go. – Čím víc benzínu máš, tím dál dojedeš.

The older I am, the slower I become. – Čím jsem starší, tím jsem pomalejší.

The more money you earn, the higher taxes you pay. – Čím víc vyděláváš, tím vyšší platíš daně.
